

CAUTION

Be Safe Everyday!

Being safe is important. You have to be aware and make smart choices so you can be safe.

Keeping out of dangerous situations is a good way to remain safe, so you won't be hurt physically or mentally.

Being aware of your surroundings can help you be safe, that way you don't hurt someone or be hurt by someone else.

Risks are always present, so using safe actions can help you reduce these risks.

If you are doing something risky, make sure you know the flaws that are present when doing so, and make sure you know what to do if something goes wrong.

If you make smart choices, keep yourself and the ones around you safe, you won't have to worry about unsafe consequences!
