

# LIFE SAFE

**Your safety:** You may see these signs a lot. Those are there to keep you and others from danger.

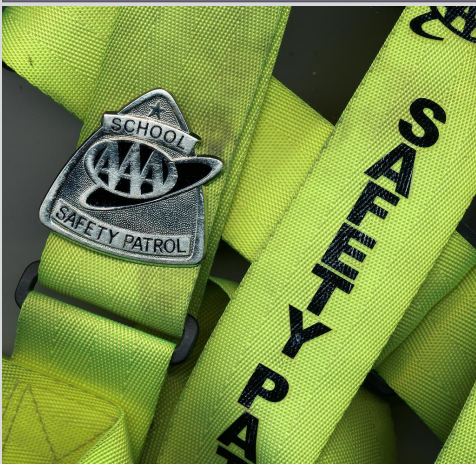

**Taking control:** You have the power to choose to be safe. Little decisions that can make a change. Like choosing to put on a seatbelt when in the car.

**SEAT BELT**

**School safety:** Your safety is very important everywhere, even at school. At school you should try to be safe. By walking down the halls and not being a bully to others.

**Pay attention:** people everywhere have their phones which can be a issue. People can get hit by cars or get seriously injured because they don't pay attention.
