

# FIRE

# SAFETY

There are many ways to practice and insure your safety during a fire, but planning an escape route can be very effective.

First, you would want to plan out 2 or more exits in case of a fire.

Such as...

Back Window

Front or back door

or a

Secondly, you should plan where you would meet after you escape the fire.

But, beware! Check doorknobs! If they're hot, fire may be on the other side!

Fire isn't always the most dangerous. Smoke inhalation is 50%-80% cause of **DEATH!**

Examples:

OR

You could meet at your neighbors house

The fire hydrant.

If you encounter smoke, drop to the ground and crawl to safety.

Ground

It's a 100% foggy here
